

G5 Panels and Putty

vI.0

Question:

How do you configure Putty to connect to G5 panels?

Answer:

I. Open new Putty session and expand the SSH section by clicking on the + symbol.

This will allow Putty to create an SSH session to your panel. This can be saved as part of a session in Putty so that you do not have to check this box each time you connect to the panel, however, this must be accomplished for each panel you are connecting to.
