

## Technical Support Guide

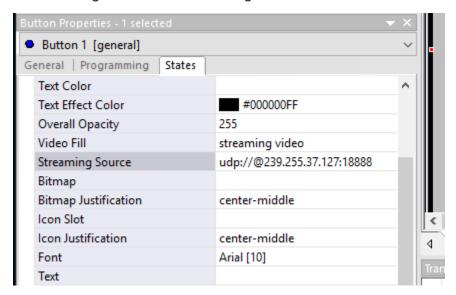

v1.0

## Stream Video to G4 and G5 panels

## Configuring Button properties in TPD4 and TPD5 for SVSI streaming video

- In TPD draw a button
- In button properties, select "States", "All States"
- Change Video Fill to "Streaming Video"

In the example above, we are using the multicast stream output by the encoder.

This URL can be found on the settings tab of the encoder.

<sup>\*\*\*</sup> you can only stream from 3000 series encoders to AMX panels.
