# Smoke and Haze Fluid Storage Guidelines

#### Question:

How long can Martin smoke and haze fluid be stored for?

### **Answer:**

For storage temperatures in the range of 10°C to 30°C (50°F to 86°F), fluids may be stored in un-opened sealed containers for up to 5 years.

For fluid installed (un-sealed) in smoke machines, the life will be reduced to 2 years when operated in the 10°C to 30°C (50°F to 86°F) temperature range.

Fluids can be stored and used at higher ambient temperatures, but with consequential loss of service life.

If fluid has been stored for long periods of time, partial separation of the ingredients can occur and you should shake the fluid bottle thoroughly to mix the fluid before use.

#### About HARMAN Professional Solutions

HARMAN Professional Solutions is the world's largest professional audio, video, lighting, and control products and systems company. Our brands comprise AKG Acoustics®, AMX®, BSS Audio®, Crown International®, dbx Professional®, DigTech®, JBL Professional®, Lexicon Pro®, Martin®, Soundcraft® and Studer®. These best-in-class products are designed, manufactured and delivered to a variety of customers in markets including tour, cinema and retail as well as corporate, government, education, large venue and hospitality. For scalable, high-impact communication and entertainment systems, HARMAN Professional Solutions is your single point of contact. www.harmanpro.com
