

Question:

Why am I receiving a connectivitycheck.gstatic.com message when I connect to the Ui mixer's hotspot?

Answer:

[Connectivitycheck.gstatic.com](https://connectivitycheck.gstatic.com) is one of many subdomains of gstatic.com. [Gstatic.com](https://gstatic.com) is a web domain used by Google for accessing the Gstatic server: a server where Google hosts its static content like CSS, Javascript code and images. It is used by Chrome and Android devices to check if a user has internet access to the network they are connected to, if not, the browser will load the captive portal login webpage, or else it will let the users access the internet. In short, the message received is only given when the wifi you are connecting to does not have internet service.

About HARMAN Professional Solutions

HARMAN Professional Solutions is the world's largest professional audio, video, lighting, and control products and systems company. Our brands comprise AKG Acoustics®, AMX®, BSS Audio®, Crown International®, dbx Professional®, JBL Professional®, Lexicon Pro®, Martin®, and Soundcraft®.
