

994-Get IP Address of Touchpanel from code

Please see the downloadable file 994-DLI-Get IP Address of Touchpanel from code.axs. This example demonstrates the use of the NetLinx structure `IP_ADDRESS_STRUCT` to define a variable and then store information received from the `GET_IP_ADDRESS` NetLinx function. You can then use the `.IPADDRESS` operator on the variable you defined of type `IP_ADDRESS_STRUCT` to obtain the IP Address of the Touchpanel. See `Help..Netlinx Keywords` `Help..Index..GET_IP_ADDRESS` for an explanation of the structure elements.

About HARMAN Professional Solutions

HARMAN Professional Solutions is the world's largest professional audio, video, lighting, and control products and systems company.
