726-Vote Priority Override Changes

10-Jun-21

Question:

How do you change the priority override to a toggling button in the Vote Solutions system?

Answer:

The design of this operation is intended to be a momentary action. In order to make it a toggling action, some custom code will need to be added. This can be accomplished by changing the channel code of the Priority Override button, on the touch panel, to an unused channel number. Then write a `BUTTON_EVENT` for that new button that performs a `DO_PUSH` and a `DO_RELEASE` of the original Priority Override button. Here is a sample `BUTTON_EVENT` to accomplish this:

```
BUTTON_EVENT[dvTPStation1,27] // New unused channel code on panel.
{
    PUSH:
    {
        [dvTPStation1,27] = ![dvTPStation1,27] // Toggles the state of the button.
        IF([dvTPStation1,27])
        {
            DO_PUSH_TIMED (dvTPStation1,7,DO_PUSH_TIMED_INFINITE)
        }
        ELSE
        {
            DO_RELEASE (dvTPStation1,7)
        }
    }
}
```

About HARMAN Professional Solutions

HARMAN Professional Solutions is the world's largest professional audio, video, lighting, and control products and systems company. Our brands comprise AKG Acoustics®, AMX®, BSS Audio®, Crown International®, dbx Professional®, DigiTech®, JBL Professional®, Lexicon Pro®, Martin®, Soundcraft® and Studer®. These best-in-class products are designed, manufactured and delivered to a variety of customers in markets including tour, cinema and retail as well as corporate, government, education, large venue and hospitality. For scalable, high-impact communication and entertainment systems, HARMAN Professional Solutions is your single point of contact. www.harmanpro.com
