

## How to change the audio nature of C5 and C1000 microphones

### What is common in C1000S, C5 microphones and C5 WMS heads?

The AKG C5 variants, including the Wireless Handheld Transmitter heads and the AKG C1000S models up from MKII has the same capsule, therefore the accessories used are the same. There are two plastic converter caps may be attached onto the capsule that can change the audio nature of the microphone.

Adapter caps for the capsules:

PPC1000 Polar Pattern Converter, (part number is 2334Z00020, PPC1000 ADAPTER)

This adapter changes the original Cardioid pattern to Hypercardioid.

PB1000 Presence Boost Converter (part number is 2334Z05010, BOOST ADAPTOR)

This adapter as the name describes has an effect on presence, it boosts 5dB between 5kHz and 9kHz.

#### About HARMAN Professional Solutions

HARMAN Professional Solutions is the world's largest professional audio, video, lighting, and control products and systems company. Our brands comprise AKG Acoustics®, AMX®, BSS Audio®, Crown International®, dbx Professional®, DigiTech®, JBL Professional®, Lexicon Pro®, Martin®, Soundcraft® and Studer®. These best-in-class products are designed, manufactured and delivered to a variety of customers in markets including tour, cinema and retail as well as corporate, government, education, large venue and hospitality. For scalable, high-impact communication and entertainment systems, HARMAN Professional Solutions is your single point of contact. [www.harmanpro.com](http://www.harmanpro.com)
