

Question:

Where can I find the latest version of PCM Effects Reverb for Mac OS?

Answer:

Lexicon PCM Native Effects Bundle Version 1.2.9 is available now for download. This is the latest version compatible up to Mac OS version 10.15 Catalina. Resolves previous installer issues with Mojave and Catalina. Use the Download link on the right side of this web page.

Designed to bring the highest level of sonic quality and function to all of your audio applications, the PCM Native Effects Bundle will take center stage in your DAW.

FEATURES

- 7 sonically brilliant Lexicon effect algorithms
- Hundreds of versatile presets
- Multi-platform compatibility: Windows® XP, Vista, 7 and 8.1; Mac® OSX 10.4 -- 10.10 PowerPC and Intel (32 & 64-bit)
- Formats that work seamlessly in any AAX, VST, Audio Unit, or RTAS compatible DAW
- Graphical real-time display for visualizing the effect in different ways
- Stereo/Phase meters for ensuring mono compatibility
- Presets can be stored in a DAW- independent format which allows custom presets to be transferred between DAWs
- Full parameter control and automation
- Input, output and feedback meters for quick assessment of audio levels within the algorithm
- iLok protected software (Requires iLok2 or later USB smart key - not included).
