

Question:

Are AMX devices susceptible to the Apache Log4j vulnerability (CVE-2021-4428) or other related Log4j vulnerabilities (CVE-2021-45046)?

Answer:

A zero-day vulnerability was identified in the Apache Log4j logging software on Friday December 10th 2021 (CVE-2021-4428). A related log4j vulnerability was identified on Tuesday December 14th 2021 (CVE-2021-45046).

These vulnerabilities could allow bad actors to take control of organizational networks. AMX has assessed all products and services for usage of the Log4j logging software and has concluded that there is no risk exposure for the vulnerability described by Apache Log4j Vulnerability CVE-2021-4428 or CVE-2021-45046.

About HARMAN Professional Solutions

HARMAN Professional Solutions is the world's largest professional audio, video, lighting, and control products and systems company. Our brands comprise AKG Acoustics®, AMX®, BSS Audio®, Crown International®, dbx Professional®, DigiTech®, JBL Professional®, Lexicon Pro®, Martin®, Soundcraft® and Studer®. These best-in-class products are designed, manufactured and delivered to a variety of customers in markets including tour, cinema and retail as well as corporate, government, education, large venue and hospitality. For scalable, high-impact communication and entertainment systems, HARMAN Professional Solutions is your single point of contact. www.harmanpro.com
