

Frequently Asked Questions

v1.0

Expected Sleep Behavior of EON ONE MK2

1-Mar-22

Question:

What are the sleep behavior differences when on battery or on AC power?

Answer:

Starting with firmware v5.0.7.0, when unit is running on battery, the unit will sleep after 20 minutes if these conditions are met:

- No signal
- No knob rotation
- No app movement

The system will wake up:

- With roughly -56dBu signal detection on ANY channel
- A knob twist
- An action within the app

The unit will also shutdown after 5 hours. This is for battery life/health and can not be disabled. If the unit has gone into shutdown mode (powered on for 5 hours), only a power button press will wake it.

There is NO SLEEP at all when the unit is connected to AC power.

About HARMAN Professional Solutions

HARMAN Professional Solutions is the world's largest professional audio, video, lighting, and control products and systems company. Our brands comprise AKG Acoustics®, AMX®, BSS Audio®, Crown International®, dbx Professional®, DigiTech®, JBL Professional®, Lexicon Pro®, Martin®, and Soundcraft®. These best-in-class products are designed, manufactured and delivered to a variety of customers in markets including tour, cinema and retail as well as corporate, government, education, large venue and hospitality. For scalable, high-impact communication and entertainment systems, HARMAN Professional Solutions is your single point of contact. www.harman.com
