

Question:

Are DXLink and DXLite products interchangeable and/or compatible with each other?

Answer:

DXLink and DXLite devices are not interchangeable and have limited compatibility. They do not have the same feature set and only use some of the same technology. As such Harman cannot guarantee functionality of DXLite TX and RX devices in place of the DXLink TX and RX devices. The DXLite devices were specifically designed for use with the NCITE line of Video presentation systems with added compatibility with the 4K60 products in the DVX and DGX families and are a scaled down version of the DXLink devices. Below is a link to our DXLink compatibility tool to better help you determine which device is right for you.
