

## Frequently Asked Questions

v1.0

### SRX800 Sleep Mode

22-Apr-22

#### Question:

Can I turn on or off the Auto Sleep feature?

#### Answer:

The Auto Sleep feature can be turned on/off from the Main Menu. When set to “ON” the unit will automatically shut down the amplifier channels to reduce power consumption. The default settings for Auto Sleep are:

- Threshold: Output must be -75dB below full-scale output
- Delay: Threshold must not be crossed for 30 minutes

**Note:** The Auto Sleep settings cannot be adjusted from the rear panel of the unit. The settings for Auto Sleep can only be adjusted in Audio Architect.

#### About HARMAN Professional Solutions

HARMAN Professional Solutions is the world's largest professional audio, video, lighting, and control products and systems company.
