Adding Additional AB4000 EW for More Gain

16-Jun-22

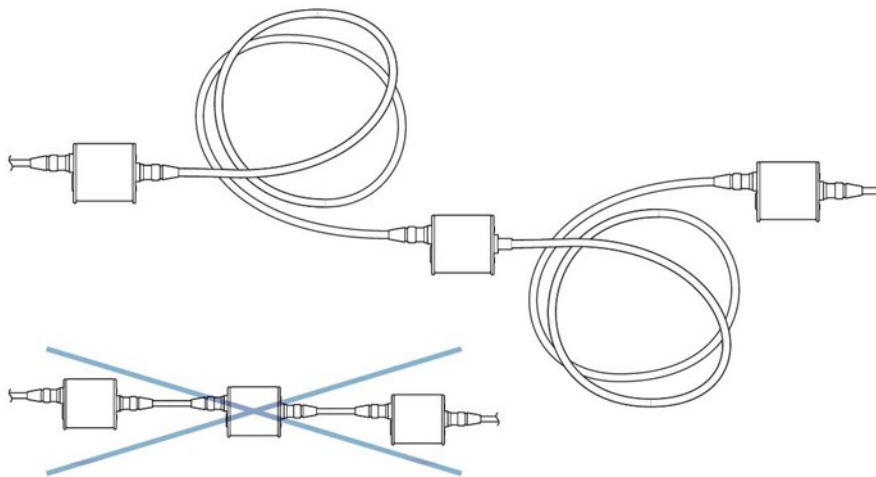

Question:

Can I connect two or more AB4000 EW to get more gain?

Answer:

Yes.

A maximum of three AB4000 EW antenna boosters may be used in series for very long cable runs. A minimum amount of cable length is needed between two boosters as well as between an active, boosted antenna and antenna booster (e.g. 40 m of RG58 or 80 m of RG213). Make sure to set the CLA-switch according to the loss of your cable. A gain higher than necessary will worsen the performance.

About HARMAN Professional Solutions

HARMAN Professional Solutions is the world's largest professional audio, video, lighting, and control products and systems company. Our brands comprise AKG Acoustics®, AMX®, BSS Audio®, Crown International®, dbx Professional®, DigiTech®, JBL Professional®, Lexicon Pro®, Martin®, and Soundcraft®. These best-in-class products are designed, manufactured and delivered to a variety of customers in markets including tour, cinema and retail as well as corporate, government, education, large venue and hospitality. For scalable, high-impact communication and entertainment systems, HARMAN Professional Solutions is your single point of contact. www.harman.com
