Daisy Chaining N-Series Encoders and Decoders

3-Aug-22

Question:

Can the N-Series encoder and decoders be daisy chained?

Answer:

Once network connection is established to one unit, you can daisy-chain additional units by connecting ethernet cables between devices using their P0 and/or P1 ports. Keep in mind that the number of units supported in the configuration is limited by bandwidth (total aggregate stream must be less than 1 Gb/s).

Note: PoE+ power is only supplied to the unit connected directly to the network. All other units in the daisy-chain must have an external power supply.

About HARMAN Professional Solutions

HARMAN Professional Solutions is the world's largest professional audio, video, lighting, and control products and systems company. Our brands comprise AKG Acoustics®, AMX®, BSS Audio®, Crown International®, dbx Professional®, JBL Professional®, Lexicon Pro®, Martin®, and Soundcraft®. These best-in-class products are designed, manufactured and delivered to a variety of customers in markets including tour, cinema and retail as well as corporate, government, education, large venue and hospitality. For scalable, high-impact communication and entertainment systems, HARMAN Professional Solutions is your single point of contact. www.harman.com
