v1.0   Using Big Desktop [BigD] Mode on an iPad   30-Aug-22

Question:

Can I use the Ui mixer's Big Desktop (BigD) Mode on an Ipad?

Answer:

Yes, you can. Go to Settings (Gear icon) -> SETTINGS tab -> LOCAL tab. Find BIG DESKTOP MODE FOR MIX and turn it ON. It will ask if you want to reload the mixer. Press OK.

You might need to zoom out the mixer view to have a proper overview. If you want to do so, go to the System Preferences -> Safari -> PAGE ZOOM. In the Page Zoom menu, you can choose zoom percentage. For the Ui mixer, you cannot choose a size larger than 100%. For Big Desktop Mode 75% could be a good starting point.
