v1.0

Network Configuration Reset of a Soundcraft Ui Mixer

15-Sep-22

This procedure does NOT do a full reset of the mixer or reset any passwords. This procedure only resets the Network Configuration settings.

1. Power off the mixer using the power switch

2. While the mixer is powered off, press and hold the reset button on the side of the mixer. This button is recessed inside a small hole about the size of a ball point pen.

3. Power on the mixer while still holding the reset button.

4. Continue holding the Reset button for 10 seconds and release.

5. Let the mixer sit undisturbed for approximately 3 minutes while it performs the reset.

6. Power the mixer off and back on again.

7. When the blue "Wi-Fi" light stops blinking and stays on solid, you should be able to discover and connect to the internal Hotspot again.
