

**Question:**

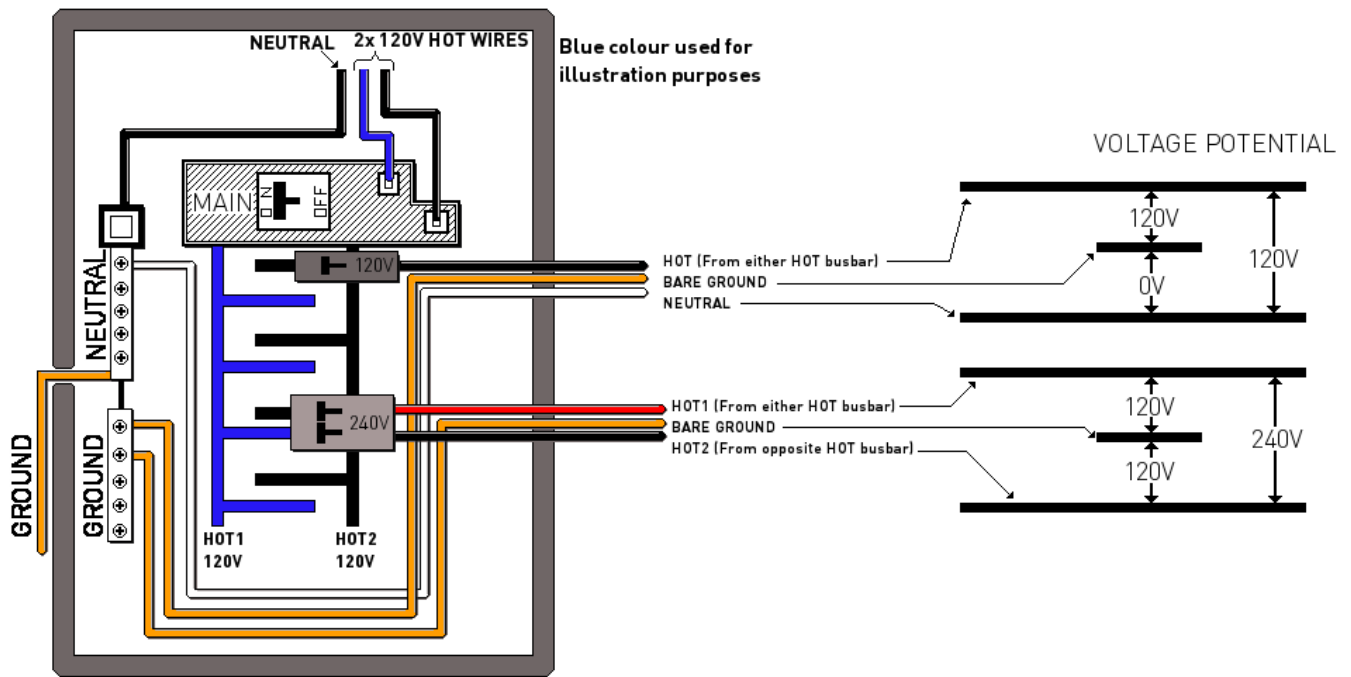

How can I connect a JEM Glaciator Dynamic to a USA residential 240V power source?

**Answer:**

The JEM Glaciator Dynamic is capable of operating at both 208V 60Hz (USA industrial 3 phase) and also 240V 60Hz (USA residential supply).

**\*\*ONLY TRAINED ENGINEERS SHOULD PERFORM THE WIRING OPERATION REQUIRED\*\***

A suitable 240V breaker capable of supplying 30A will need installing in the distribution box to provide 2x 120V Hot lines.

**Typical US Residential 120V and 240V Circuits**

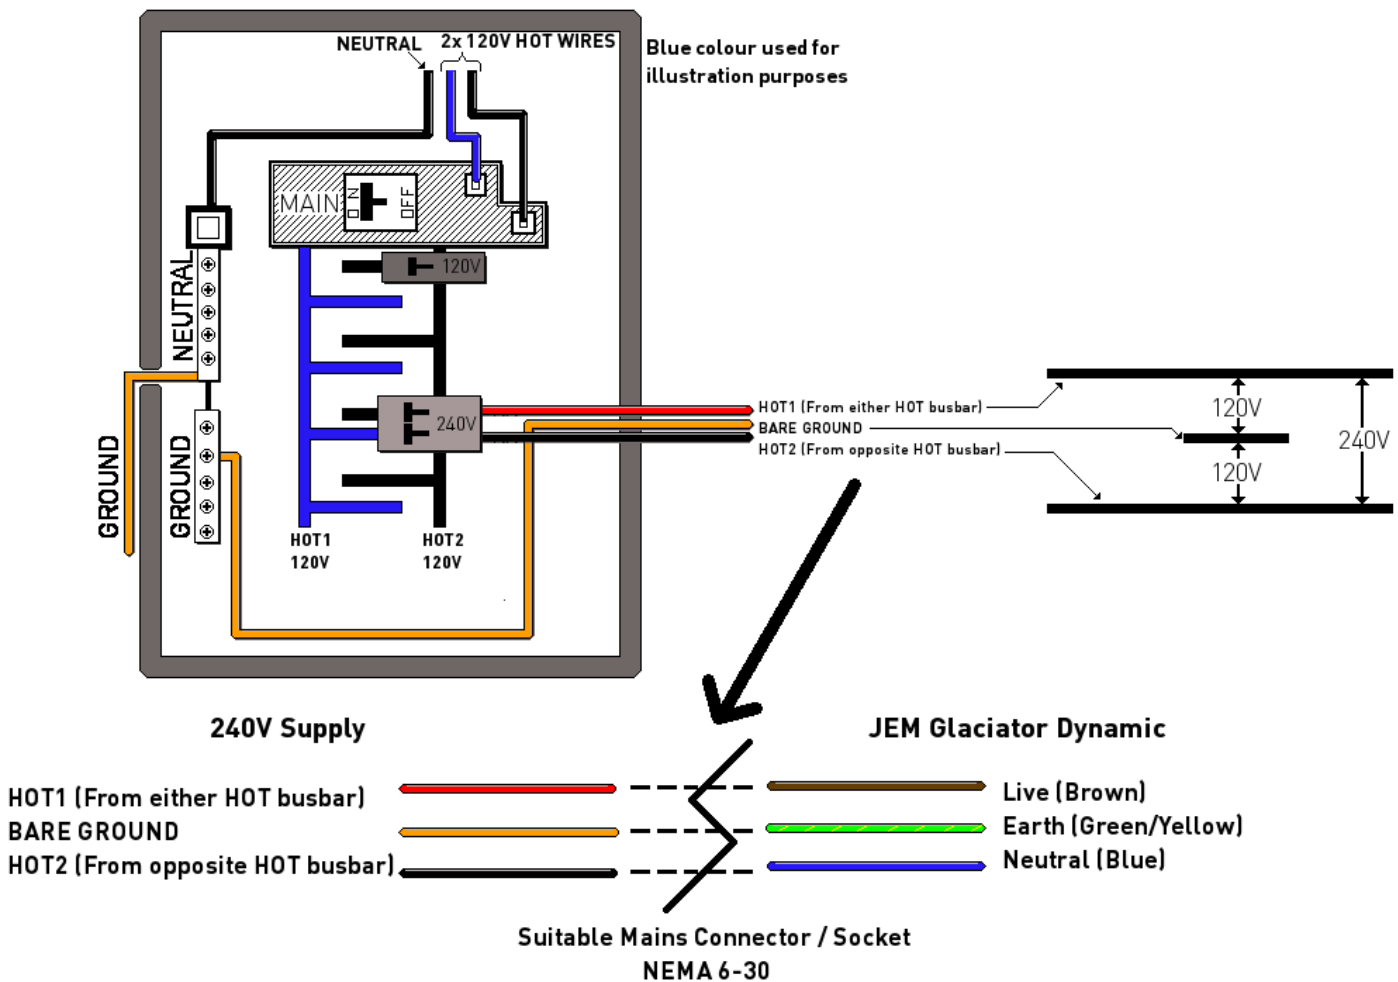

**About HARMAN Professional Solutions**

HARMAN Professional Solutions is the world's largest professional audio, video, lighting, and control products and systems company. Our brands comprise AKG Acoustics®, AMX®, BSS Audio®, Crown International®, dbx Professional®, DigiTech®, JBL Professional®, Lexicon Pro®, Martin®, and Soundcraft®. These best-in-class products are designed, manufactured and delivered to a variety of customers in markets including tour, cinema and retail as well as corporate, government, education, large venue and hospitality. For scalable, high-impact communication and entertainment systems, HARMAN Professional Solutions is your single point of contact. [www.harman.com](http://www.harman.com)

Connection of the JEM Glaciator Dynamic is shown in the diagram below.

A suitable 30A NEMA 6-30 connector and socket is advised.

Installation of a 240V breaker will require correct colour coding/labelling of all wiring to denote a HOT2 is now present in the circuit..
