MAC Quantum WASH, Overdrive "Zoom"

3-Jan-23

Question:

What is the "Overdrive" Zoom function on the MAC Quantum Wash?

Answer:

Normal zoom range DMX values 0-200, Overdrive 201-255.

When enabling overdrive, the lens can move outside the housing. If a soft lens is mounted, then the lens will hit it. That is why it is a separate function. So it should not could happen by accident.

About HARMAN Professional Solutions

HARMAN Professional Solutions is the world's largest professional audio, video, lighting, and control products and systems company.
