## Importing Custom Ui Preset Files

18-Jan-23

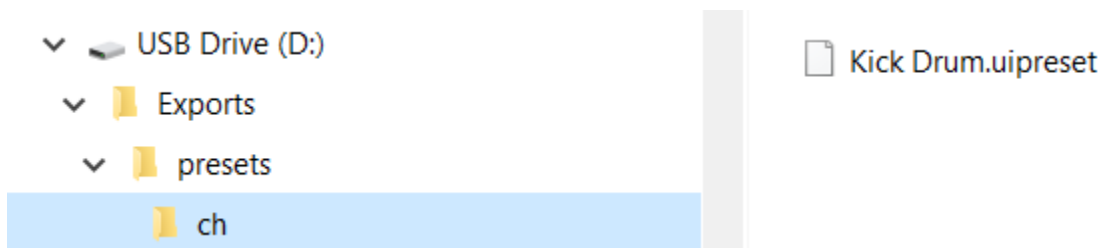

**Question:**

How do I import Ui Preset files on to my own mixer?

**Answer:**

Third parties have begun selling presets for the Ui mixers online. If you are having trouble importing these presets, this is likely because they you were provided only the actual preset file, and not in the proper folder structure. Outlined below is the proper folder structure that the file preset files must be in for the Ui mixer to recognize the file.

File type is .uipreset

If the preset files are not in this structure, the mixer will give an error message indicating it cannot find the correct type of file.

**About HARMAN Professional Solutions**

HARMAN Professional Solutions is the world's largest professional audio, video, lighting, and control products and systems company. Our brands comprise AKG Acoustics®, AMX®, BSS Audio®, Crown International®, dbx Professional®, JBL Professional®, Lexicon Pro®, Martin®, and Soundcraft®. These best-in-class products are designed, manufactured and delivered to a variety of customers in markets including tour, cinema and retail as well as corporate, government, education, large venue and hospitality.
