Advantages of AC Power Over Battery on the EON One MK2

18-Jan-23

Question:

Is there any advantage to powering the JBL EON One MK2 with AC instead of battery?

Answer:

Aside from not having the run time limitation of a battery, the EON One MK2 has a higher maximum output when powered with AC. The maximum sound pressure level (SPL) you can archive on battery is about 119db, you get 123db when it's connected to AC. Powering the unit from AC gives you more headroom to work with.

About HARMAN Professional Solutions

HARMAN Professional Solutions is the world's largest professional audio, video, lighting, and control products and systems company. Our brands comprise AKG Acoustics®, AMX®, BSS Audio®, Crown International®, dbx Professional®, JBL Professional®, Lexicon Pro®, Martin®, and Soundcraft®. These best-in-class products are designed, manufactured and delivered to a variety of customers in markets including tour, cinema and retail as well as corporate, government, education, large venue and hospitality. For scalable, high-impact communication and entertainment systems, HARMAN Professional Solutions is your single point of contact. www.harman.com
