Using Unlisted Touchscreens with the Ui24R Mixers

19-Jan-23

Question:

Is there a way to use a touchscreen with the Ui24R mixer that is not listed in the User Guides?

Answer:

Yes, there is a workaround to using a non-supported touchscreen. You may add a small Android-based box (TV Box) or Mini PC to the system. This way you can start to use your touchscreen immediately, and the screen can work on its native resolution so you will be able to use the advanced functionality that Big D mode offers you.

The following part of the Ui24R webinar displays this application:
