

v1.0

Si Multi Digital Card is Unsupported

19-Jan-23

Question:

Will the Multi Digital Card work in the current OS, MAC, or Windows Operating Systems?

Answer:

Last supported Operating Systems below-

* PC Compatibility: The Soundcraft Multi Digital Card supports Windows XP, Vista, Windows 7, and Windows 8 and will NOT support any OS after Windows 8.

* Mac Compatibility: The Soundcraft Multi Digital Card supports Mac OS 10.6.x Snow Leopard through to 10.11.x El Capitan and will NOT support any OS after El Capitan (10.11).

NOTE-We have had reports of the firewire interface working “ok” with some MAC versions after El Capitan, but have many reports of it NOT working at all in Ventura (13.0). As the device is end of life and unsupported, there will be no updates to drivers, software, or hardware in the future..

About HARMAN Professional Solutions

HARMAN Professional Solutions is the world's largest professional audio, video, lighting, and control products and systems company. Our brands comprise AKG Acoustics®, AMX®, BSS Audio®, Crown International®, dbx Professional®, JBL Professional®, Lexicon Pro®, Martin®, and Soundcraft®.
