Move Multiple Lines in Netlinx Studio

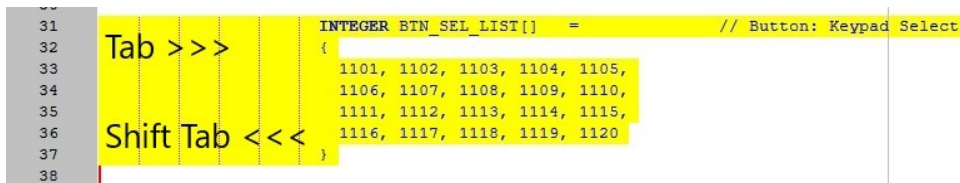

23-Feb-23

Question:

How do you move multiple lines left or right in Netlinx Studio at the same time?

Answer:

Highlight the desired lines to be moved. Use Tab to indent the lines and move them to the right, use Shift+Tab to unindent and move the lines to the left.

The screenshot shows a code editor with line numbers 31 to 38 on the left. Lines 32 through 36 are highlighted in yellow. To the left of the code, there are two annotations: 'Tab >>>' next to line 32 and 'Shift Tab <<<' next to line 36. The code itself is as follows:

```
31  
32 INTEGER BTN_SEL_LIST[] = // Button: Keypad Select  
33 {  
34 1101, 1102, 1103, 1104, 1105,  
35 1106, 1107, 1108, 1109, 1110,  
36 1111, 1112, 1113, 1114, 1115,  
37 1116, 1117, 1118, 1119, 1120  
38 }
```

About HARMAN Professional Solutions

HARMAN Professional Solutions is the world's largest professional audio, video, lighting, and control products and systems company. Our brands comprise AKG Acoustics®, AMX®, BSS Audio®, Crown International®, dbx Professional®, JBL Professional®, Lexicon Pro®, Martin®, and Soundcraft®. These best-in-class products are designed, manufactured and delivered to a variety of customers in markets including tour, cinema and retail as well as corporate, government, education, large venue and hospitality. For scalable, high-impact communication and entertainment systems, HARMAN Professional Solutions is your single point of contact. www.harman.com
