Controlling the Jetpack

23-Feb-23

Question:

What are the various ways Jetpack can be controlled?

Answer:

- Basic day-to-day operations may be performed at the included wall keypad or via a simple user webpage.
- Jetpack Manager software provides basic operation.
- Advanced operation and setup are available via an administration webpage and through a full API.
- The Jetpack is not a native NetLinx device, but it can be controlled with AMX or any third-party control system via standard Telnet or SSH using the API.

About HARMAN Professional Solutions

HARMAN Professional Solutions is the world's largest professional audio, video, lighting, and control products and systems company.
