Using SVSi with HiQnet and Dante on the Same VLAN

4-Apr-23

Question:

Can SVSi equipment be on the same VLAN as HiQnet and Dante?

Answer:

No, the HiQnet traffic can be easily overcome by the multitude of multicast traffic on the VLAN. HARMAN encourages a separate VLAN for Video, audio, and control to avoid these types of disruptions within the system. HiQnet traffic would fall into the control type of traffic and not be cataloged as Audio traffic. In certain instances, it could be configured using advanced configurations to allow for SVSi and Dante to reside within the same VLAN. There are multiple configurations changes and design that need to be accounted for when deploying this type of configuration.

About HARMAN Professional Solutions

HARMAN Professional Solutions is the world's largest professional audio, video, lighting, and control products and systems company. Our brands comprise AKG Acoustics®, AMX®, BSS Audio®, Crown International®, dbx Professional®, JBL Professional®, Lexicon Pro®, Martin®, and Soundcraft®. These best-in-class products are designed, manufactured and delivered to a variety of customers in markets including tour, cinema and retail as well as corporate, government, education, large venue and hospitality. For scalable, high-impact communication and entertainment systems, HARMAN Professional Solutions is your single point of contact. www.harman.com
