Extracting the DSP Configuration From a Soundweb 'Green' Device

7-Apr-23

Question:

Is it possible to extract the DSP configuration from a BSS Soundweb device such as the 9088 and 3088?

Answer:

The DSP configuration cannot be extracted from the device. The DSP configuration files are compiled and sent to the Soundweb device after clicking the "Load" or "Load All" button in the Network window in Soundweb Designer software. The DSP configuration files cannot be de-compiled and cannot be opened in Soundweb Designer.

Note: The DSP configuration is not the same as the Soundweb Designer file (.sdf). The DSP configuration comprises only the audio DSP code, parameter preset information, link information and control port configuration.

About HARMAN Professional Solutions

HARMAN Professional Solutions is the world's largest professional audio, video, lighting, and control products and systems company. Our brands comprise AKG Acoustics®, AMX®, BSS Audio®, Crown International®, dbx Professional®, JBL Professional®, Lexicon Pro®, Martin®, and Soundcraft®. These best-in-class products are designed, manufactured and delivered to a variety of customers in markets including tour, cinema and retail as well as corporate, government, education, large venue and hospitality. For scalable, high-impact communication and entertainment systems, HARMAN Professional Solutions is your single point of contact. www.harman.com
