What is the Maximum Distance Between N-Series Devices

29-Jun-23

Question:

What is the maximum distance between the N-Series devices?

Answer:

The maximum distance between devices is 100 meters (328 feet) over CAT5e cable. This distance can be extended in increments of 100 meters (328 meters) by using a gigabit switch as a repeater between devices. Copper Ethernet connections can be up to 100 meters but the use of fiber can extend network connections up to many kilometers.

About HARMAN Professional Solutions

HARMAN Professional Solutions is the world's largest professional audio, video, lighting, and control products and systems company. Our brands comprise AKG Acoustics®, AMX®, BSS Audio®, Crown International®, dbx Professional®, JBL Professional®, Lexicon Pro®, Martin®, and Soundcraft®. These best-in-class products are designed, manufactured and delivered to a variety of customers in markets including tour, cinema and retail as well as corporate, government, education, large venue and hospitality. For scalable, high-impact communication and entertainment systems, HARMAN Professional Solutions is your single point of contact. www.harman.com
