## JEM AF1-MkII Fan Blade Changes

11-Feb-25

**Question:**

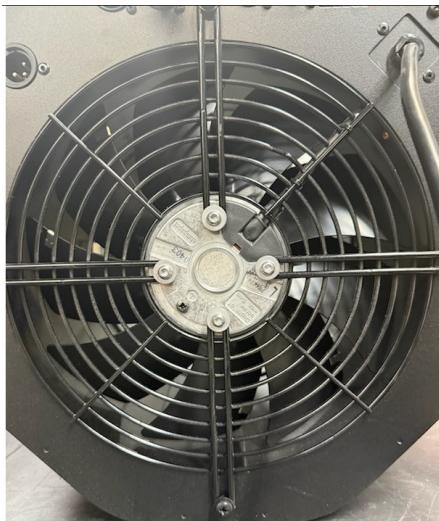

Why does my newer JEM AF-I MkII have a different fan blade count to my older units?

**Answer:**

For over 20 years...The original AF1 and newer AF1-MkII fan units had a 9 blade fan installed.

This has now (after all this time) become obsolete from the supplier so a new comparable fan has been sourced.

The newer AF1-MkII fan units now have a 5 blade fan installed.

Any 230V unit after serial 14509793701 (production date 1st March 2023) or any 115V unit after serial 14509794101 (production date 3rd April 2023) will have the new 5 blade fan installed.

If an older '9 blade' fixture is received for fan unit repair it will have the new 5 blade fan unit installed.

This new 5 blade fan will move more air and will possibly be slightly louder in operation compared to the older 9 blade unit.

**About HARMAN Professional Solutions**

HARMAN Professional Solutions is the world's largest professional audio, video, lighting, and control products and systems company. Our brands comprise AKG Acoustics®, AMX®, BSS Audio®, Crown International®, dbx Professional®, DigiTech®, JBL Professional®, Lexicon Pro®, Martin®, and Soundcraft®. These best-in-class products are designed, manufactured and delivered to a variety of customers in markets including tour, cinema and retail as well as corporate, government, education, large venue and hospitality. For scalable, high-impact communication and entertainment systems, HARMAN Professional Solutions is your single point of contact. [www.harman.com](http://www.harman.com)
