

What is Noise Floor?

Question:

What is noise floor?

Answer:

The **noise floor** is the level of background noise in an audio system when no signal is being played. It's the quietest sound the system produces, often caused by the electronics in the amplifier.

Often perceived as a faint hissing, this is a characteristic of all active or self powered speakers.

About HARMAN Professional Solutions

HARMAN Professional Solutions is the world's largest professional audio, video, lighting, and control products and systems company. Our brands comprise AKG Acoustics®, AMX®, BSS Audio®, Crown International®, dbx Professional®, JBL Professional®, Lexicon Pro®, Martin®, and Soundcraft®. These best-in-class products are designed, manufactured and delivered to a variety of customers in markets including tour, cinema and retail as well as corporate, government, education, large venue and hospitality.
