

Removing Tomcat Defaults from the RMS Server

Sometimes local security teams will detect the Tomcat default pages and apps as a security vulnerability. If so, you need to remove them from the Tomcat directory. This will not affect the running of RMS, but it will remove the base webpage you see when you enter in the RMS address without the /rms at the end. The following steps will remove all documents, default webpages, and default applications.

1. Stop Tomcat
2. Browse to C:\Program Files\Apache Software Foundation\Tomcat X\webapps
3. Delete the docs, manager, and ROOT folders. The only things left should be the rms folder and the rms.war file.
4. Start Tomcat

About HARMAN Professional Solutions

HARMAN Professional Solutions is the world's largest professional audio, video, lighting, and control products and systems company. Our brands comprise AKG Acoustics®, AMX®, BSS Audio®, Crown International®, dbx Professional®, DigiTech®, JBL Professional®, Lexicon Pro®, Martin®, Soundcraft® and Studer®. These best-in-class products are designed, manufactured and delivered to a variety of customers in markets including tour, cinema and retail as well as corporate, government, education, large venue and hospitality. For scalable, high-impact communication and entertainment systems, HARMAN Professional Solutions is your single point of contact. www.harmanpro.com
