## NI DVX Webpage Fix for Flash

21-Feb-23

The following steps are to add HTML5 pages to a NI series DVX Switcher:

### OPTION 1

This process runs a script to copy over the new HTML5 web pages.

1. Download the `dvx_New_Webpages.zip` file from this KB entry.
2. Extract the `.zip` file into the root directory. In MOST cases this is `C:\`.
3. Open up the Windows Command Prompt (start, type: `cmd`).
4. At the prompt change the directory location to the extracted file. For example, if the folder is saved in the root directory this will be `cd \dvx_New_Webpages`.
5. At the prompt type the following: `ftp -s:ftpscript.txt <NI controller's IP address>`. Example:  
`ftp -s:ftpscript.txt 192.168.1.10`
6. Once the script has completed running, go to the controller's webpage and click on the link `dvx_New_Webpages`.

**Note:** If the administrator login for the DVX is not the default (administrator/password), you will need to change it to the default or edit the `ftpscript.txt` file with the correct login info.

### OPTION 2 (recommended)

This process will use FTP to copy over the HTML web pages.

1. Download the `dvx_New_Webpages.zip` file from this KB entry.
2. Extract the `.zip` file. A folder named `dvx_New_Webpages` will be created.
3. Open another instance of Windows File Explorer (Alternatively you may use an FTP client such as FileZilla).
4. In the address bar enter: `FTP://<NI controller's IP address>`.
5. A login prompt may appear. (Default login: administrator | password)
6. File Explorer may pop up a new window behind the first. Bring this new window to the front to see the current file system on the controller.
7. Drag or copy/paste the previous extracted folder `dvx_New_Webpages` to the FTP window
8. Once all files are copied, go to the controller's webpage and click on the link `dvx_New_Webpages`

Please note the HTML5 pages take a considerable amount of time to load and sync up, so please be patient.

#### About HARMAN Professional Solutions

HARMAN Professional Solutions is the world's largest professional audio, video, lighting, and control products and systems company. Our brands comprise AKG Acoustics®, AMX®, BSS Audio®, Crown International®, dbx Professional®, JBL Professional®, Lexicon Pro®, Martin®, and Soundcraft®. These best-in-class products are designed, manufactured and delivered to a variety of customers in markets including tour, cinema and retail as well as corporate, government, education, large venue and hospitality. For scalable, high-impact communication and entertainment systems, HARMAN Professional Solutions is your single point of contact. [www.harman.com](http://www.harman.com)
