v1.0

ZonePro Designer Windows 10 & 11 Microsoft .NET Framework Issue

04-Apr-22

Question:

Why does my installation for ZonePro GUI Designer keep failing on Windows 10/11?

Answer:

1. Press the Windows key on your keyboard or access the search bar, type "Windows Features", and press Enter. The **Turn Windows features on or off** dialog box appears.

2. Select the **.NET Framework 3.5 (includes .NET 2.0 and 3.0)** check box, select **OK**, and reboot your computer if prompted.

3. You do not need to select the options for **Windows Communication Foundation (WCF) HTTP Activation** and **Windows Communication Foundation (WCF) Non-HTTP Activation**.
